

LD3 MKII Tube Condenser Microphone

The LD3 MKII is a tube condenser microphone with a classic, vintage look and sound. There are nine different polar patterns remotely selectable on the power supply for the ultimate in versatility and ease of operation. The available patterns are: omni-directional, cardioid, figure 8, with six intermediate stages. The LD3 MKII also has a PAD and a LOW-PASS filter, located on the microphone body. Its tube preamplifier circuitry features a mil-spec 6072A vacuum tube. The LD3 MKII is an idea microphone for capturing warm, rich vocals as well as studio and concert hall instrumental recordings.

Specifications:

Frequency Response.....	20Hz-20KHz
Sensitivity: @ 1000Hz 94dB S.P.L.....	20mV/Pa
Rated Impedance	200 ohms
Equivalent Noise Level	18dB (A weighted IEC 651)
Max S.P.L. @ 0.5% THD @ 1KHz	134dB
Power Requirement	supplied vintage style 110/220VAC
